

STATEMENT

I am Tom, I am 21 years old. I love working in a group, I feel good working with other people and thus gain new knowledge. I consider myself an organized person and I learn from my mistakes, so until the end I try to solve the problems I encounter. I am an empathetic, sincere and honest person. I treat my work as pleasure, not duty.

Personal Project

Vizualize Sorting

[Github repository](#)

The principle of the program is very simple. To start, the program uses a for loop to generate an array of random values. Array values are set from 5 to 750 by default. After this operation is performed, the user can select one of the prepared algorithms for sorting these tables.

Wildfire Tracker

[Github repository](#)

This is a React app to track wildfires and plot them on a Google map.
